Some work has already been done on the project and it currently looks as follows:

Now that you know what has to be done. Let us prepare the environment for you to get started.

Objectives

1. Fork the project.
2. Create GitHub pages to publish the project.

Exercise 1 : Fork the project

1. Login to your GitHub.

2. Fork the repo at https://github.com/ibm-developer-skills-network/vftvk-Simple-Interest-Calculator

3. You will now have your own copy of the repository to work on.

4. Verify that you see the following three files in your repository.

    1. index.html
    2. style.css
    3. script.js

Exercise 2 : Publish on GitHub pages

GitPages allows you to publish the content on your git repo as a web site, which can be accessed by anyone on the internet.

You can use this feature to publish any of your projects. Let us create a URL for the project you are about to complete.

1. Navigate to your project repo.(The one you have forked earlier)

2. Go to the settings page.

Options	## Settings
Manage access	**Repository name**
Security & analysis	[vftvk-Simple-Interest-Calculator] [Rename]
Branches	☐ **Template repository**
Webhooks	Template repositories let users generate new repositories with the same directory structure and files. Learn more.
Notifications	
Integrations	**Social preview**
Deploy keys	Upload an image to customize your repository's social media preview.
Actions	Images should be at least 640×320px (1280×640px for best display).
Environments	**Download template**
Secrets	
Pages	
Moderation settings	

4. Select the master branch source and click on the Save button.

5. You will see the URL for your repository.

If your git username is watson34 and reponame is vftvk-Simple-Interest-Calculator, your URL would be
http://watson34.github.io/vftvk-Simple-Interest-Calculator

7. When you open this URL in a browser you should see the unfinished Simple Interest Calculator project. If you get '404' error page, please be patient. It may take upto 60 minutes for the website to show up after you have created the URL.

8. Save this URL. You will asked to submit this URL for peer review **that comes next in the course**.
